**Squarell technology**

reliable vehicle data

What do I need before I start installing Squarell devices?

Thank you for choosing Squarell. Our support team is happy to help you with the installation of your Squarell devices.

Preparations

Before you start, make sure you take the following with you:

Bring your own

Hardware:

- Windows laptop with internet
- Multi-Meter/Volt-Ohm-Meter
- Camera or smartphone

Account access:

- Expertview/iControl
- Squarell Support Portal
- AnyDesk (for remote support)

Get from Squarell

Install Squarell software:

- iControl

Download installation instructions:

You need to log in to the Support Portal before you can download manuals.

- Download manuals

Connect your laptop to the Squarell device via RS-232 connection

- If your laptop doesn't have an RS-232 connector, use an RS-232-to-USB converter;
- The FLEX is equipped with an RS-232 connector;
- The SOLID uses an additional RS-232 cable (R4). If the SOLID has an R3 cable, you will need an RS-232 *gender changer* and possibly a *null modem* cable.

You're now ready to start the installation!
